

The Katie Kazoo Spelling Bee

Spelling Bees are all the rage, and your crew can have its own special bee using words found in the Katie Kazoo, Switcheroo books. We've modified the rules a bit, so here's how your bee will work.

We've provided 58 words on individual cards as a starting place for your bee. For each word, we've provided a sentence or two—taken right out of the Katie Kazoo, Switcheroo books—to help the speller remember the word in context. Your teacher has a list of the words, too, so all of you will have a chance to prepare for the bee.

Before you begin, select someone from your group to be the “beekeeper.” He/she will read out the words, while each of the spellers takes a turn. Each speller must repeat the word before spelling it and can ask the keeper to read the sentence. The speller has one minute to try spelling the word. If it is spelled correctly, he/she goes to the back of the line and waits for another turn. If the word is spelled incorrectly, the player sits down and the keeper spells it out loud. Everyone should listen and learn the correct spelling. That word may just come 'round again, if all of the cards are used and there are still players left.

You might also want to add some of your own words to the Katie Kazoo Spelling Bee, so we have included some extra cards. Make sure the words and sentences come from a Katie Kazoo, Switcheroo book.

Katie Kazoo Spelling Bee Word List

Below are the lists of words that will be used for the spelling bee. The more you study them, the better you'll do!

articles	formula	precious
auditorium	freckles	puffed
